

Date :

TREE STUDY

Type of Tree :

Did you find anything in your tree? (Squirrels, birds, spiders, ants, lizards?)

Season :

Make sure and do this again every season of this year so you can see how your tree changes with the seasons.

Measure Your Tree with a tape measure, how big around is it?

Remember to observe your tree by watching closely, and listening to the sounds that come from it. Use a magnifying glass or binoculars to observe it more closely.

Drawing of Your Tree

Sample of a leaf or leaf rubbing
